

## Ready to Click? Enclosed instructions for correct use

Thank you for your interest in PowerClick, the innovative bike attachment system. With PowerClick, you can securely attach various accessories to your bike, such as a bottle holder, panniers, or tools, allowing you to transport a wide range of items with ease. The user-friendly design ensures easy installation and removal, making it a convenient choice for all cyclists.

To mount the PowerClick base, simply use the 2 screws provided and attach it to the existing threads in the frame. Make sure to mount the base with the base pad facing the frame for a secure attachment. If you prefer to have the PowerClick in a different position, you can use the included Velcro straps, which are threaded onto the base plate. This allows you to use the PowerClick at any position you want on your bicycle.

We hope this information helps, and we're here to assist you with any further questions you may have.

# How to start your click experience

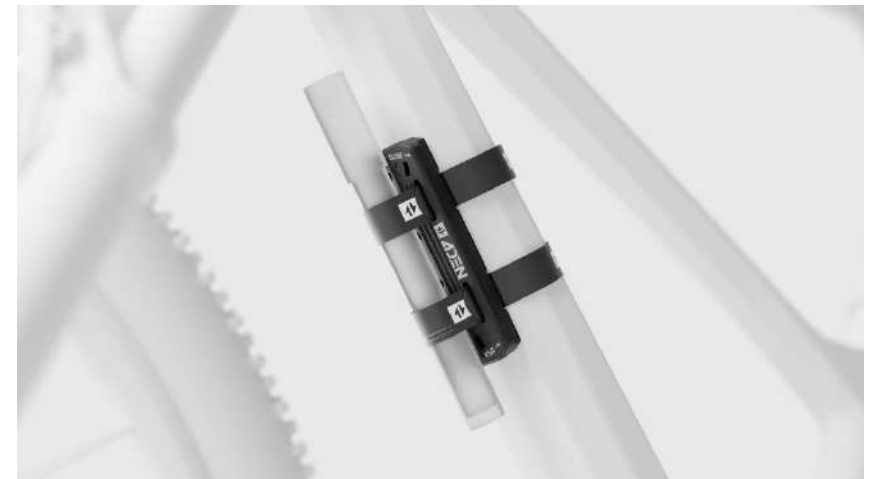

As already described above, the base plate must be attached first.

The base plate can now be attached to the frame using screws. Use the included screws and screw the base plate to the frame of your bike.

Depending on the distance between the frame, the included rings should be used. There are two different heights of the rings, try it out for which height you need which rings.

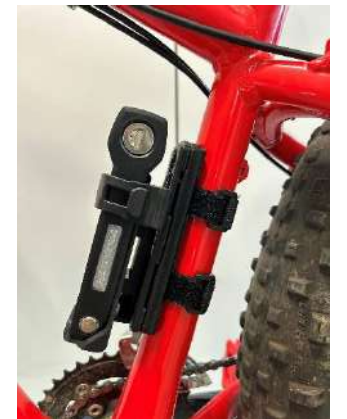

Should the base plate be placed somewhere else on the frame? Simply use the included Velcro straps.

Check beforehand which size you need and then select the Velcro straps.

# How to use the Multiplate?

A wide variety of things can now be attached to the multi-plate. Be creative and attach everything you need for your next bike ride or your daily commute! Change the multiplate with another multiplate with a different object in a few seconds. You've never been able to get ready for a ride on your bike so quickly and easily. With several multi-plates you can always quickly decide what you need for today's tour and click.

\*Example images: Bag, bike lock, bottle, puncture kit and air pump are not included

# First Click

If you have now attached your base plate and a multi-plate is equipped.

Are you ready to click! Place the multiplate turned to the left on the base plate.

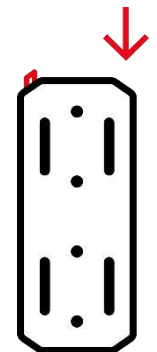

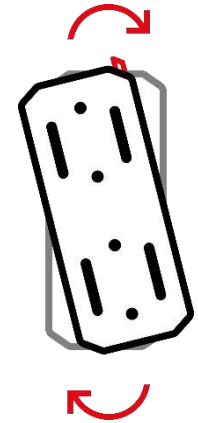

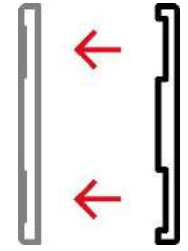

Now press the multi-plate into the base plate and turn it to the right. Click!

Now you can also lock your multi-plate by using the rocker on the top of the multi-plate.

You have to lock the multi-plate, press the pin that is sticking out.

Your multi-plate is now locked.

If you want to unlock the multi-plate again, simply press the pin on the left side.

# Show us what you click !

You are now part of the #ADENfamily - show us what you click!

Send us your pictures how you use the PowerClick system.

As an incentive, we take the most creative submission every two weeks and reward it with a basic set for free!

So click and take pictures **to win a free PowerClick Basis Set**
